An absolute delight! This classic center entrance colonial is not to be missed. The fully updated kitchen with stainless appliances, quartz counter-tops and eco-friendly cork flooring combines warmly finished high end cabinetry with soft touch drawers and doors, plus pull out storage shelving in the pantry. The family room with wood flooring features a brick hearth, wood stove and french doors that open to a 4-season sunroom overlooking the outside deck and private wooded backyard. The dining room with hardwood floors, cozy carpeted living room, office, functional mudroom, 1/2 bath and laundry complete the first floor. Good sized master bedroom retreat with walk in closet. Noteworthy master-bath amenities include double sinks, large walk in shower and built in lighted vanity. Three additional bedrooms and the second full bath make for a comfortable floor plan. Granite entry steps, mature landscaping close proximity to schools, commuting and thriving W. Acton make this a must see!
