

164 Summer Street

Maynard, MA 01754

And this one is "Just Right!" with the perfect mix of superb indoor and outdoor space. Gleaming hardwood floors throughout most of the house, beautiful custom built-ins by skilled craftsman add personality and function to living room and dining rooms, and lovely kitchen (renovated in 2017) with gorgeous stone counters opens on to a beautiful multi-level deck. If you crave outdoor space that's private and beautiful, you have got to see this back yard - and the "she/he shed" with French doors. The lower level of the house offers a family room, laundry, half bath and garage. Roof is young - installed in 2014, and MassSave has insulated the house. A solar array on the back of the house helps make this home more economical! Paved driveway with turn around means there is plenty of space for friends and family to visit. This will be the house everyone wants to come to!
